

Nikhilesh Ramoliya

Software Developer

+91-8469175299 • nikhileshramoliya@gmail.com • Ahmedabad, Gujarat, India • LinkedIn

SKILLS

Languages:	JavaScript, TypeScript, Python
AI & LLM Ecosystem:	LangChain, LangGraph, LangSmith, Large Language Models (LLMs), Agentic Workflows
Frontend:	React.js, Next.js, Redux, React Query, Material UI
Backend:	Node.js, NestJS, Express.js, FastAPI, Supabase
Databases:	PostgreSQL, MongoDB, MySQL
Cloud & DevOps:	AWS (EC2, S3, RDS, ECS, ELB, SQS, SES), Docker, NGINX, CI/CD (CodePipeline), NX Monorepo
Payments & Tools:	Stripe, PayPal, Cashfree Jest, Mocha, Chai Jira, Jenkins, Git
Architecture:	Microservices (Kafka), Role-Based Access Control (RBAC), REST APIs, WebSockets, Micro-Frontends

EXPERIENCE

Senior Software Engineer | Lanatus Systems October 2022 - Present

- Led backend and microservices architecture (NestJS, Kafka, Docker, PostgreSQL) for scalable Software-as-a-Service (SaaS) and live-streaming platforms handling thousands of users.
- Reduced AWS infrastructure costs by 66% (\$12,000 to \$4,000/month) through rigorous architecture optimization and resource tuning.
- Improved application performance by 90% by optimizing PostgreSQL database queries, indexing strategies, and frontend rendering.
- Built automated Continuous Integration/Continuous Deployment (CI/CD) pipelines with AWS CodePipeline, reducing deployment effort by 40%.
- Implemented secure subscription billing engines via Stripe supporting one-time and recurring payments, collaborating across teams to ship major feature releases strictly on schedule.

PROJECTS

Raspberry.ai — AI Design Assistant Platform

- Engineered an agentic AI co-creator for an infinite-canvas board, enabling users to generate, connect, and arrange image nodes via natural language chat.
- Architected the reasoning engine using Python, LangChain, and LangGraph to autonomously decide which canvas tools to invoke based on user prompts.
- Built FastAPI endpoints to broadcast real-time AI activity to the frontend, while managing backend asset management and resolving production Sentry bugs.

Technologies: React.js, Supabase, Python, FastAPI, LangChain, LangGraph, LangSmith

Retainly — Contract & Invoicing Platform

- Designed and developed scalable backend APIs featuring robust Role-Based Access Control (RBAC) for managing enterprise users, projects, contracts, templates, invoices, and payment collection.
- Built a fully customized contract editor using the Tiptap editor, managing payment collections including one-time payments, installments, and recurring invoices via Stripe.

Technologies: Next.js, NestJS, PostgreSQL, Stripe, Shopify, Redis, BullMQ, Docker, NGINX

Apyhub — API Testing & Ecosystem Studio

- Architected a standalone Notion-style API testing studio featuring live integrations with Jira, Confluence, GitHub Issues, and Postman.
- Created a lightweight CLI variant for cloud and automated CI/CD API testing, delivering 15 screens and 2 major releases in 2 months.

Technologies: React.js, Node.js, PostgreSQL, Docker, CLI, Yarn Workspaces

Mansion Voyeur — Live Video Streaming Platform

- Architected live video ingestion, streaming, and automated VoD recording infrastructure (AWS S3, EC2, RDS) supporting 50 simultaneous HD feeds.
- Optimized cloud resource allocations and integrated seamless checkout flows, successfully reducing monthly infrastructure costs from \$12,000 to \$4,000.

Technologies: Next.js, Node.js, PostgreSQL, AWS (S3, EC2, RDS), Stripe, PayPal

EDUCATION

Bachelor of Engineering Government Engineering College, Rajkot	2018 – 2022
High School Diploma Purohit Science School, Jamnagar	2016 – 2018
